A lot of the other Union members had stopped in The Fig Leaf, and the place was full. Some of the guys were already buying their booze on the cuff, and everybody had glum looks on their faces. I wasn't particularly surprised when the argument between the bricklayer and the brickmaker resumed where it had left off. This time, nobody broke it up..nate from fiction these idiosyncratic qualities other readers find valuable, art being of an order of complexity nearer to that of human beings (high) than that of facial tissues (low)..across forty million miles..Amos stood blinking as jewels by the thousands fell out on the floor, glittering and gleaming, red..Then, too, suppose it were possible to learn enough about human embryonic development to guide.\* Please don't write to tell me that the activities involved in sexual reproduction are not inconvenient at all, but are a lot of fun. I know that better than you do, whoever you are. The fun is an evolutionarily developed bribe designed to have us overlook and forgive the inconveniences. If you are a woman, you will see the point more quickly, perhaps, than a man wilt.The assumption here is that matters not subject to cut-and-dried "hard" proof don't bear any relation to evidence, experience, or reason at all and are, therefore, completely arbitrary. There is considerable indirect evidence one can bring against this view. For one thing, the people who advance it don't stick to it in their own lives; they make decisions based on indirect evidence all the time and strongly resist any imputation that such decisions are arbitrary. For another, if it were possible to do criticism according to hard-and-fast, totally objective rules, the editor could hire anyone to do it and pay a lot less than he has to do now for people with special ability and training (low though that pay necessarily is). It's true that the apparatus by which critics judge books is subjective in the sense of being inside the critic and not outside, unique, and based on the intangibles of training, talent, and experience. But that doesn't per se make it arbitrary. What can make it seem arbitrary is that the whole preliminary process of judgment, if you trace it through all its stages, is coextensive with the critic's entire education. So critics tend to suppress it in reviews (with time and training most of it becomes automatic, anyway). Besides, much critical thinking consists in gestalt thinking, or the recognition of patterns, which does occur instantaneously in the critic's head, although without memory, experience, and the constant checking of novel objects against templates-in-the-head (which are constantly being revised in the light of new experience), it could not occur at all.\* Hence angry readers can make the objection above, or add:.timer that would allow him to stop a scene, or advance or regress it at any desired rate.
