her face. Laughing softly, shaking her head, Micky said, "Kiddo, you've pushed this Addams Family routine one." "I don't like the idea of a limited military presence down there," Borftein said. "We're trusting the Chironians too much. I still say they could have strength that they're not showing yet. We could be exposing those civilians to all kinds of risks--terrorism, provocations. What if they get hit by surprise? I've seen it all before." Micky cocked her head and frowned skeptically. "I'm not sure I should believe anything you tell me." "Ah, well, it's not over yet," Hanlon said. His eyes twinkled for a second as he remembered something else. "Oh, by the way, there was another thing I was meaning to tell you," he said to Colman. "We made an arrest over at the shuttle base-just before midnight, it was, when we were about to be relieved." "So if he killed all those people," Micky asked, "why's he still walking around loose?" Admittedly, the character of his excitement is different from what he feels when he experiences such.

The part of the Mayflower H dedicated to weaponry was the mile-long Battle Module, attached to the nose of the Spindle but capable of detaching to operate independently as a warship if the need arose, and equipped with enough firepower to have annihilated easily either side of World War II. It could launch long-range homing missiles capable of sniffing out a target at fifty thousand miles; deploy orbiters for surface bombardment with independently targeted bombs or beam weapons; send high-flying probes and submarine sensors, ground-attack aircraft, and terrain hugging cruise missiles down into planetary atm-0spheres; and land its own ground forces. Among other things, it carried a lot of nuclear explosives.

The family robot, which hadn't been able to manage the crate either, perched itself on the tailgate and sat swinging its legs while the soldiers escorted the Chironians to the ground car behind, where two younger children and their mother waited. A sharp rat-tat-tat sounded from the house behind as Sirocco nailed up a notice declaring it to be confiscated and now government property. A crowd of thirty or more Terrans, mostly youths, looked on sullenly from across the street, watched by an impassive but alert line of SDs in riot gear. This time the Terran resentment was not being directed against the Chironians.

Sirocco frowned and rubbed his nose. "I'm not convinced. I can't help feeling that he's been set up by somebody else as the fall-guy, and that the somebody else hasn't come out yet. I think the Chironians believe that too."

In this darker night, several structures loom, all humble and yet mysterious. A barn, a stable.

Chapter 23. "You said you've only got until your next birthday, and then all bets are off."

Cynicism soon turned to rebellion as more of the Terran population came to perceive Phoenix not as a protective enclave, but at worst a prison and at best a self-proclaimed lunatic asylum. Apartment units were found deserted and more faces vanished as expeditions to Franklin came increasingly to be one-way trips. Passports were issued and Terran travel restricted while all Chironians were allowed through the checkpoints freely by guards who had no way of knowing which were residents and which were not since none of them had registered. The sentries no longer cared all that much anyway; their looking the other way became chronic and more and more of them were found not to be at their posts when their relief showed up. An order was posted assigning at least one SD to every guard detail. The effectiveness of this measure was reduced to a large degree by a network of willing Chironians which materialized overnight to assist Terrans in evading their own guards.

"I'm not sure that I agree as much as I thought," Kalens told him. "Stern may have a point. We should try it his way to begin with at least. We don't have to stick with the plan indefinitely."

Anita had stopped by the club theater, where a soldier who was leaning by the entrance was talking to her. She slipped an arm through his and laughed something in reply. "About as much as that." Colman said, nodding his head. "Forget it. Maybe you did me a favor." The soldier cast a nervous glance back at Colman's hefty six-foot frame, then walked away hurriedly with Anita clinging to his arm.

"Down!" Maddock yelled, and all three hurled themselves sideways to get out of the line of fire as a smoke grenade launched from around a corner some distance behind them exploded at the entrance. Fire from the entranceway raked the area as the D Company squad broke cover and rushed forward through the smoke, hut the first of them was still twenty feet away when the steel door slammed down and alarms began sounding throughout the Government Center.

-. "They weren't," Jay protested. "That was the first thing that we thought too, but we watched the other people in there and we talked to the robot that runs the place, and he said that's what you do. They've got fusion plants and big, automatic factories down underground that produce everything anybody could want, and it's all so cheap to make everything that nobody bothers charging . . . or something like that. I can't figure it out."

Without shame, the mutt squats and urinates on the blacktop.

I haven't actually met her though.".Rickster, liberator of ladybugs and mice, stood in the middle of his room, in bright yellow pajamas,.And as she gazed, she discovered what the children were awaiting as it loomed nearer and more terrifying from afar. The realization tightened her stomach. Even from fifteen years ago... it was she--for she had come with the Mayflower H. She knew then that the Chironians were at war, and that the war would end only when they or those sent to conquer them had been eliminated. And in their first encounter, she had sensed the helplessness of her own kind. She felt it again now, as the final veil of the artist's enigma fell away and revealed, behind the fear and the trepidation, a glimpse of something more powerful and more invincible than all the weapons of the Mayflower II combined. She was staring at her own extinction..murdered family in Colorado. And since he's grown comfortable with this identity, why change?."The half that's left is off-limits," Micky declared. "The only pie in play is my piece.". "You look as if you might know something about it," Lesley said to Colman. "Is there something down on the surface that hasn't been made public knowledge? ". Now that Swley had moved from the bar, her party manner had given way to something more intimate. Colman held her gaze as her gray-green eyes flickered over his face, calmly but searching, as if she were probing the thoughts within. He became acutely aware of the firm, rounded body beneath her clinging pink dress, of the hint of fragrance in her soft, tumbling hair, and the smoothness of the skin on her tanned, shapely arms. Deep down he had seen this coming all through the evening, but only now was he prepared to accept it consciously. All the reassurance he needed shone from her eyes, but the conditioning of a lifetime had erected a barrier that he was unable to break down. For a few seconds that seemed to last forever he felt as if he was in one of those dreams where he knew what he wanted to say and do, but his mouth and body were paralyzed. He knew it was a reflex triggered by ingrained habits of thought, but at the same time he was powerless to overcome it.,Surprising the boy, she affectionately squeezes his right hand. "Whenever people think they're smarter.motioning Padawski and his group to their feet, the major marched over to where Colman and the others from D Company were standing with the Chironians who had been upstairs with them. He had already taken their names and established that they had not witnessed the incident firsthand. "You guys are free to go," he informed them. "If there's a hearing, you might be called in to testify. If so, the appropriate people will contact you..submission..something when you tell these tall tales about Dr. Doom murdering boys in wheelchairs.". "Nonsense, Micky," Geneva said. "Tomorrow I can bake another apple pie all for you.".Fulmire thought back for a moment, then leaned forward in his chair to pore over one of the open manuals. "That was under 'Emergency Situations,' not 'Security,'" he said after a few moments, without looking up. "You want me to prevail upon Howard to prevent his destroying himself..".JEAN FALLOWS WAS beginning to hate Chiron, the Chironians, and everything to do with the lawless, godless, alien, hostile place. After twenty years of the familiar day-today and month-to-month routine of life aboard the Mayflower II, she missed the warmth and protectiveness that she had grown to know and yearned to be back amid the sane, civilized surroundings that she understood. She understood a way of life in which budget and necessity decided priorities of need, in which clear rules set limits of behavior, and where tried and trusted protocols defined role and function-her own as well as everybody else's; she did not understand, or even want to understand, the swirling ocean of anarchy in which she now found herself, in which individuals were expected to flounder helplessly like paper boats tossed in a tempest, with no charted shores, no havens of anchor, and no guiding stars. She had no place in it, and she desired no place in it. Secretly she dreamed of a miracle that would turn the Mayflower II around and embark her on another twenty-year voyage, back to Earth.. "Till they killed him..".anger might overwhelm her. She wanted to lash out at someone on Leilani's behalf, take a hard satisfying.Humor is emotional chaos remembered in tranquility. ?James Thurber.of the battle zone.
