Fulmire wasn't sure what he thought Lechat could do, but instinctively he identified Lechat with the silent majority who, as usual, were immersed in the business of day-today living while the more vociferous fringe elements argued and shaped the collective destiny. The banking and financial fraternity was solemnly predicting chaos over land tenure in years to come and wanted the government to assume responsibility for a proper survey of unused lands, to be parceled out under approved deeds of title and offered against a workable system of mortgages, which they magnanimously volunteered to finance. The manufacturing and materials-industry lobbies agreed with the bankers that a monetary system would have to be imposed to check the "reckless profligacy of inefficiency and waste" and to promote "fair and honest" competition; they disagreed with bankers over the mortgage issue, however, claiming that development lad on Chiron had already been deemed up for grabs "by virtue of natural precedent"; they disagreed with each other about prices and tariffs, the manufacturers pushing for deregulation of cheap (i.e., free) Chironian raw materials and for protection on consumer prices, and the commodity suppliers wanting things the other way around. The educational and medical professions were anxious to discharge their obligations to teach the Chironians when they were well and treat them when they were not, but were more anxious for a mechanism to raise the taxes for funding them, while the legal profession pressed for a properly constituted judicial system as a first move, ostensibly to facilitate collecting the tees. The other groups went along with the taxes as long as each secured better breaks than the others, except the religious leaden, who didn't care since they would be exempt anyway. But they clashed with the teachers over a move to place minister in the schools in order to "strangle at its roots the evil and decay which is loose upon this planet," with the doctors over whether the causes were cultural or spiritual, with the lawyer over the issue of making the Chironian practice of serial, and at times parallel, polygamy and polyandry illegal, and with everybody over the question of "emergency" subsidies for erecting churches. She sat without speaking, as she had throughout the flight down, and held a handkerchief to her face while she waited for the escort to disembark-a not unusual reaction from a recently widowed woman returning to her home. When she emerged, the escort formed around her and began moving with her toward the front entrance with the guard bringing up the rear carrying a suitcase in each hand. In misfortune lies the seed of future. kind to imagine such a thing." CHAPTER FIFTEEN. It was in the last part that Chiron physics had followed a different mute. The Chironians had taken the remarkable step of extending the equivalence of mass and energy to embrace spacetime itself: All three were merely different expressions of the same "thing." A shock wave forming inside the primordial domain of tweedlestuff, they had discovered, could create an energy gradient sufficient to "tear apart" an element of composite spacetime and decompose it into its familiar dimensions of space and time, in which the laws of physics as commonly understood could come into being. Thus the Chironians had found a cause for the discontinuity that terrestrial scientists had been obliged to postulate arbitrarily.. Jean shook her head, still refusing to contemplate the prospect. "But why does it have to be over?" She looked imploringly at Bernard. "We were happy all those years in the ship, weren't we? We had our friends, like Jerry and Eve, we had the children. Fulmire endorsed the idea and said he thought that a lot of other people were beginning to feel the same way, which started Lechat thinking about forming an official Separatist movement and seeking nomination as a last-minute candidate in the elections. Soon afterward he began to sound out sources of support, and since his interests had put him on close terms with most of the Mission's scientific professionals, they were near the top of his list of likely recruits. Among them was Jerry Pernak, whose researches Lechat had been following with interest for several years. Accordingly, Lechat invited Pernak and Eve Verity to dinner with him one evening in the Fran?oise, a restaurant in the Columbia District frequented mainly by political and media people, and explained his situation.. "Give me time. You've got a great body." "Grumbling, but not too bad. Any news from inside?" "Nothing yet. It's about time you took a breather. "They're messing us around," General Johannes Borftein, Supreme Commander of the Chiron Expeditionary Force--the regular military contingent aboard the Mayflower II--told the small group that had convened for an

informal policy discussion with Garfield Wellesley in the Mission Director's private conference room, located in the upper levels of the Government Center in the module known as the Columbia District. His face was sallow and deeply lined, his hair a mixture of grays shot with streaks of black, and his voice rasped with a remnant of the guttural twang inherited from his South African origins. "We've got two years to get this show organized, and they're playing games. We don't have the time. We haven't seen any evidence of a defense program down there. Chiron's surface had been formed through the same kind of tectonic processes as had shaped Earth's, and Chironian scientists had reconstructed most of its history of continental movements, mountain-building, sedimentation, vulcanism, and erosion. Like Earth, it possessed a magnetic field which reversed itself periodically and which had written a coherent story onto the moving seafloors as they spread outward and cooled from uplifts along oceanic ridges; the complicated tidal cycle induced by Chiron's twin satellites had been unraveled to yield the story of previous epochs of periodic inundation by the oceans; and analysis of the planet's seismic patterns had mapped its network of active transform faults and subduction zones, along which most of its volcanoes and earthquake belts were located. otherwise dark, silent, and nearly scent-free desert. Ten years went by while North America and Europe completed their recovery, and the major Eastern powers settled their rivalries. At the end of that period New America extended from Alaska to Panama, Greater Europe had incorporated Russia, Estonia, Latvia, and the Ukraine as separate nations, and China had come to dominate an Eastern Asiatic Federation stretching from Pakistan to the Bering Strait. All three of the major powers had commenced programs to reexpand into space at more or less the same time, and since each claimed a legitimate interest in the colony on Chiron and mistrusted the other two, each embarked on the construction of a starship with the aim of getting there first to protect its own against interference from the others. surface and fill the air with angry wings. ever-dwindling but not yet eradicated capacity for romanticism. Stern's face darkened, and his mouth twisted into an ugly grimace. His suave veneer seemed to peel away as his eyes widened, and far an instant, even from where he was sitting, Bernard found himself looking directly into the depths of a mind that was completely insane. He shivered involuntarily. Beside him Celia gripped his arm. "General," Stern ordered. "Launch the missile in sixty seconds." Colman shook his head. "There shouldn't be any need.
