Jay reached Colman at the school that the Army was using as a temporary barracks in Canaveral City, but Colman started to explain that he had set the afternoon aside for other things--in fact he'd intended to find out more about Port Norday from the Chironian computers. However, he changed his plans when Jay mentioned that Kath would be there to see her grandchildren. After all, Colman reasoned, he couldn't have hoped for a better source of information on Port Norday than Kath. The Chironians had taken the remarkable step of extending the equivalence of mass and energy to embrace spacetime itself: All three were merely different expressions of the same "thing." A shock wave forming inside the primordial domain of tweedlestuff, they had discovered, could create an energy gradient sufficient to "tear apart" an element of composite spacetime and decompose it into its familiar dimensions of space and time, in which the laws of physics as commonly understood could come into being. Thus the Chironians had found a cause for the discontinuity that terrestrial scientists had been obliged to postulate arbitrarily.. "Pay our debt, collect our due/Each one proud/or what we do," Marie recited..Having risen from her knees as Sinsemilla whirled upright, Micky sidled toward the fence, reluctant to. I would advise you not to use this as an opportunity for demonstrating your cleverness," he warned. He allowed himself a moment to calm down. Then he resumed speaking more slowly. "Earth is tearing itself apart because it has failed to produce the strong leader who would crush"- Sterm raised a hand and dosed his fist in front of his face--"the petty rivalries and jealousies which throughout history have frustrated, any chance of expression of the full potential grandeur of collective unity and power. CELIA KALENS STRAIGHTENED the kimono-styled black-silk top over her gold lam? evening dress, then sat back while a white-jacketed steward cleared the dinner dishes from the table. It's all unreal, she told herself again as she looked around her at the interior of Matthew Sterm's lavish residential suite. Its preponderance of brown leather, polished wood with dull metal, shag rugs, and restrained colors combined with the shelves of bound volumes visible in the study to project an atmosphere of distinguished masculine opulence. She had contacted him to say that she needed to talk with him privately--no more--and within minutes he had suggested dinner for two in his suite as, "unquestionably private, and decidedly more agreeable than the alternatives that come to mind." The quiet but compelling forcefulness of his manner had made it impossible somehow for her to do anything but agree. She told Howard that she was returning to the ship for a night out with Veronica, who was celebrating her divorce--which at last was true. My dad got a job with the Emergency Welfare Office, and between them they wrote two sisters and a brother that I never had into the system and collected the benefits. So life wasn't too bad." He shrugged, almost apologetically. "I guess it got to be kind of a tradition... sort of handed down in the family..". Bernard frowned as the implication of what Jay was suggesting sank in. "Yeah," Noah acknowledged without enthusiasm..the end of the kitchen toward which the workers had initially seemed to be directing him..Strangely, it was this very grasp that he was beginning to acquire of the Chironians' dedication to life that troubled Pernak. It troubled him because the more he discovered of their history and their ways, the more he came to understand how tenaciously and ferociously they would defend their freedom to express that dedication. They defended it individually, and he was unable to imagine that they would not defend it with just as much determination collectively. They had known for well over twenty years that the Mayflower ii was coming, and beneath their casual geniality they were anything but a passive, submissive race who would trust their future to chance and the

"Will Kath fix it up for you?". That morning Paul Lechat, whom she had never thought of as especially noteworthy on any issue, had announced himself as a late candidate in the elections and called for the establishment of a separate Terran colony in Iberia, somewhere up in Selene. He wanted to allow the people from Earth to pursue their own pattern of living without disruptive influences for the immediate future, and possibly to make such an institution permanent if it suited enough people to do so. To Jean the announcement had come as a godsend, and to many others as well, if the amount of popular support that had materialized from all sides within a matter of hours was anything to go by. Why couldn't everybody see it that way? she wondered. It was so obvious. Why were there always some who were obstinate and valued political interests before what common sense said would be for the common good, such as Kalens, who even now was reacting to Lechat as a threat and rallying his own followers to action?. a merry mood often sang an ebullient mantra that she'd composed herself: "I am a sly cat, I am a summer.Perhaps Curtis's ass, among others..
